High Pile Shearing Circular
Knitting Machine

長毛剪毛圓筒針織機

PL-KDSPS-HP

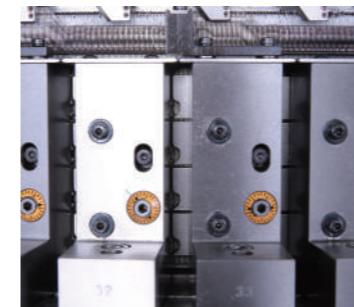

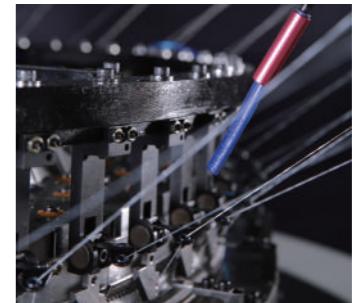

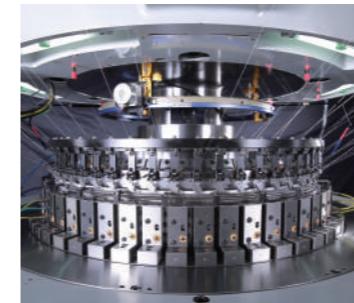

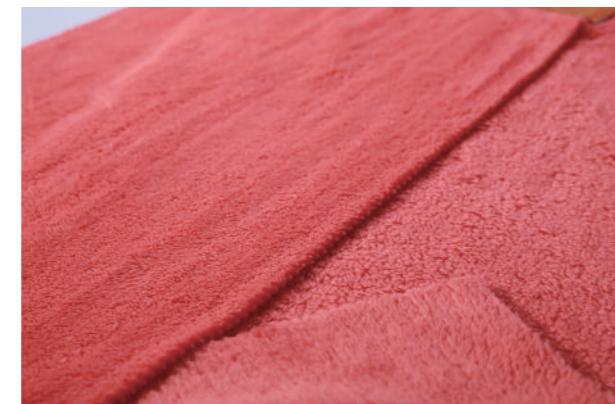

Products Introduction

PL-KDSPS-HS offers exhilarating performance in high pile direct shearing function. With pure Pai Lung refinement in combining the general loop shearing technology, and high production ability, now available with either a loop length of more than 10mm or a multi feeder system – PL-KDSPS-HS is more accessible than ever.

Pai Lung has established the Knitel knitting head as standard technology in the circular knitting machine. PL-KDSPS-HS is general equipped with the single cam track on the dial and cylinder, smooth cam surfaces, two yarn feeding carrier system in loop and ground stitches are all suitable for high pile structure in knitting process. High quality of the machine frame helps to reach heavy loading requirement.

This machine is based on double jersey knitting structure, every two feeders as one unit. Different gauge of dial and cylinder, brings the ground structure more minutely and higher density. Pile forming from original cylinder pile needle changed to dial pile needle, lead the piles inwards, to prevent piles down by anti-dust device while knitting. 4 cam tracks in cylinder now, bring you more possibility in ground face. We also placed

the dial pile needle and cutter in the same direction, loading between dial and cylinder is decreased, RPM is raised, and less debris will accumulate as well. PL-KDSPS-HP can produce plaiting terry with pile length 4mm~8mm, reverse plaiting with pile length 4mm~12mm. Fabrics from PL-KDSPS-HS can be applied for home textile, industrial purpose, man made fur apparels, and toys.

產品 介紹

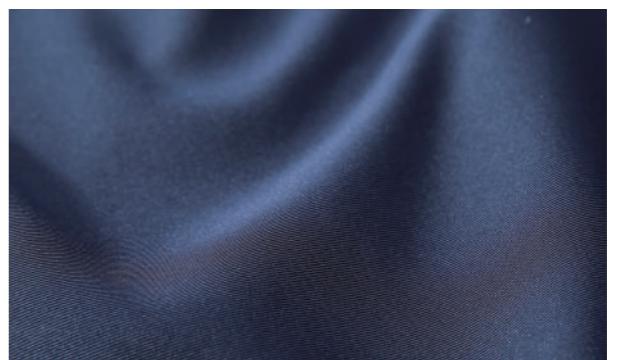

PL-KDSPS-HP

有容乃大,故能成兼容並序之美;結合佰龍原有機上剪毛特性,以及長毛效果功能。加以多口數設計優勢,能有效地取代市面上現有低口數、低效率的長毛割圈或或仿毛皮織造相關機型。佰龍在此長毛剪毛機的設計研發上,乃汲取業界對長毛織物運用經,具備客戶重視的實用機能性和此類機型獨特的功能外,展現前所未見的完美設計理念與性能表現,提供高經濟產能之效益。

本機型採用 knitel 系列之核心技術,在上針盤及針筒山角軌跡,雙紗餵紗嘴進紗角度,織針吃紗位置及張力計算,搭配先進硬度處理之針筒,以求得最佳織造毛長長度及底紗環長。將織針及沉降片運動軌跡,皆經嚴密電腦模擬計算。三角製造精密,表面光滑。並皆以合銷固定山角座滑塊,提供精準定位,織物布目得以呈現更佳的均一程度及外觀平整效果,並大幅提升運轉耗材及零件壽命。

PL-KDSPS-HP 乃是以棉毛雙面機身的架構,雙口組的概念來動作。不同針距的上下針筒,讓底面更細緻、輕薄、密度更高。原下針吃毛紗設計更改為上針吃毛紗,讓毛面向內,布面織造時不會有因為噴風裝置導致毛面方向不同所產生的倒毛現象。底面提升至四段變化,提供更多樣的變化。將切刀與刀針設計同方向運轉,省去單面的上菱角盤架構,避開了重車的問題,除提升機台轉速,清車週期也可延長。現今可以提供反包 4mm~8mm

毛長;正包4mm~12mm之長毛割圈布,其運用範圍廣泛,提供相關家紡、工業用途、玩具用布及服飾用途等。
